

The booth from above. 20 ft by 10 ft, in the gym corner.

Front elevation, how it flows, where the signs go.

WALK IT LIKE A VISITOR

1. **The line** forms along the front wall, under the curtain lights, watching the TV.
2. **Dakota** at the rope by the entrance hands out a lanyard. The Backstage / Media Team sign stands beside him.
3. **In through the flap.** Floor lights point to the three iPads on tripod stands along the back wall. The sunset lamp glows up the wall behind them.
4. **Play a game**, ninety seconds. The results screen offers **Sign up** or **Play another game**.
5. **Round table:** missed the sign-up? QR code on the cloth, or the backup laptop. Everyone gets a **box**. Cold or warm water.
6. **Out** the right side, 3 to 4 ft from the locked door.

SIGNS

- **Backstage / Media Team**, large, next to Dakota. **Decided.**
- **Wanted**, left wall, the bare 2 ft in front of the lights. **Decided.**
- **Crew Only** beside the entrance flap. *
- **All Access** on the front wall above the TV. *
- **How It Works** where the rope starts, and one inside on the back wall right of the stands. *
- **QR + High Score** inside, on the back wall behind the round table. *

* my pick, easy to move. The four station posters were dropped from the Canva design, so they are not placed.

Getting it built **two hours before the doors.**

LIGHTS AND POWER

- **One outlet** behind the back wall.
Extension cord to a **power strip** in the back-left corner inside.
- **TV + laptop:** the only long cord. Down the inside of the left wall, out under the flap, taped flat. About 15 ft.
- **Two curtain lights** are USB. A **power bank** on each, zip-tied to the tent leg. No cords outside.
- **Floor strips** are DAYBETTER 16.4 ft RGB kits, **12 V wall-plug**, not USB. Each kit has its own power brick and a small controller box with a remote. Two bricks means **two outlets on the power strip**. Start each strip at the back corner by the strip and run it toward the entrance, so the plug end is where the power is. Cut only at the marked lines and only from the far end; the plug end must stay. Lay them as chevrons and tape over with clear tape.
- **Sunset lamp** is USB, on the floor behind the stands, aimed up the wall.
- **Clip light** on the Camera stand, aimed at the visitor, not the iPad.
- **iPad chargers:** a 6 ft cable down each tripod leg to the USB block on the strip, taped so nobody trips. One 6-port block covers lamp and iPads.
- **Outlet count:** TV, laptop, two light bricks, USB block, clip light. That is six. Bring an **8-outlet strip** or two strips.

WHAT TO BRING

- 2 tents, 8 sidewalls, weights for 6 legs
- 3 tablet tripod stands, 1 round table, black cloth
- TV table, TV, laptop, HDMI cable
- 3 iPads + chargers with 6 ft cables, backup laptop
- 2 curtain lights, 2 power banks, the remote
- 2 floor strip kits with their bricks, controllers and remote, sunset lamp, clip light
- Extension cord, 8-outlet power strip, 6-port USB block
- Binder clips, zip ties, gaffer tape, clear tape, 2 gold sashes
- Rope + posts, lanyards, signs, boxes, 2 coolers
- Prize envelope, clipboard, Sharpie

Counts and where to buy: the Fair Day Playbook, Part 2.

BUILD ORDER

1. Both frames up, side by side, backs to the gym wall. Weights on all six legs.
2. Sidewalls: back, left, right, then the two front panels. The middle wall stays off.
3. Tie back the entrance (front-left) and the exit (right-front) with the sashes.
4. Cord in from the outlet, strip in the corner, TV cord along the left wall and out. Tape.
5. Stands up: three tripods 3 ft apart along the back wall toward the left, iPads at standing height, charger cables down the legs and taped. Round table right by the exit, TV table outside.
6. Lights: curtains clipped to the roof edge with banks on the legs, strips on the floor, sunset lamp, clip light.
7. Signs, rope, lanyards, boxes, coolers. Walk it once as a visitor.
