

The booth from above. 20 ft by 10 ft, in the gym corner.

Front elevation, how it flows, where the signs go.

WALK IT LIKE A VISITOR

1. **The line** forms along the front wall, under the curtain lights, watching the TV.
2. **Dakota** at the rope by the entrance hands out a lanyard. The Backstage / Media Team sign stands beside him.
3. **In through the flap.** Two lines of floor light make a lane from the flap to the three iPads. iPad 2 stands forward; the host is right behind it, in reach of all three.
4. **Play a game**, ninety seconds. The results screen offers **Sign up** or **Play another game**.
5. **Exit table:** a third floor light leads to the round table across the back-right corner. Scan the QR if you have not signed up. Give your name; the worker sees it appear on the **live sign-up sheet** on the laptop and hands over a **box** and a water. Boxes and coolers stay behind the table.
6. **No box? Straight out** the right side, 3 to 4 ft from the locked door. The table never blocks the exit.

SIGNS

- **Backstage / Media Team**, large, next to Dakota. **Decided.**
- **Wanted**, left wall, the bare 2 ft in front of the lights. **Decided.**
- **Crew Only** beside the entrance flap. *
- **All Access** on the front wall above the TV. *
- **How It Works** where the rope starts, and one inside on the back wall right of the stands. *
- **QR + High Score** inside, on the right wall beside the exit table. A small QR stands on the table too. *

* my pick, easy to move. The four station posters were dropped from the Canva design, so they are not placed.

Getting it built two hours before the doors.

POWER

- **One outlet** behind the back wall. Extension cord to a **power strip** in the back-left corner inside.
- **TV + laptop:** the only long cord. Down the inside of the left wall, out under the flap, taped flat. About 15 ft.
- **Second cord:** from the corner strip along the base of the back wall to a **small power strip under the exit table**. It feeds the name-check laptop and floor strip 3. Taped flat, hidden by the cloth.
- **iPad chargers:** a 6 ft cable down each tripod leg to the USB block on the strip, taped so nobody trips. One 6-port block covers lamp and iPads.
- **Two curtain lights** are USB. A **power bank** on each, zip-tied to the tent leg. No cords outside.
- **Outlet count, corner strip:** TV, TV laptop, lane lights (one or two bricks), USB block, clip light, the second cord. Up to seven, so the **8-outlet strip. Under the exit table:** laptop and strip 3.

FLOOR LIGHTS

- **Three rolls:** DAYBETTER 16.4 ft, **12 V wall-plug**, not USB. Straight lines, no chevrons, no fiddly cuts. The **plug end always goes where the power is**.
- **The lane, two rolls:** start both at the back wall, one each side of iPad 1, 3 ft apart, and run them straight to the flap. About 9 ft each. If both rolls share one controller and its leads will not spread 3 ft, lay the first foot of each roll sideways along the back wall, then turn.
- **Line 3, the roll from home:** plug end under the exit table, out across the floor in front of the stands, to the lane. About 13 ft.
- **Spare length:** no need to cut. Fold the roll back beside itself in a loose U, never a sharp crease. If you do trim, cut at a copper scissors mark on the **far end only**; the cut-off piece is dead. Tape over with clear tape. One remote sets all three at once.
- **Sunset lamp** is USB, on the floor behind the stands, aimed up the wall.
- **Clip light** on the Camera stand, aimed at the visitor, not the iPad.

WHAT TO BRING

- 2 tents, 8 sidewalls, weights for 6 legs
- 3 tablet tripod stands, 1 round table, black cloth
- TV table, TV, laptop, HDMI cable
- 3 iPads + chargers with 6 ft cables
- Name-check laptop + charger, the sign-up sheet open
- 2 curtain lights, 2 power banks, the remote
- 3 floor strip rolls (the new 2-roll kit + the good one from home), bricks, controllers, remotes
- Sunset lamp, clip light
- 2 extension cords, 8-outlet power strip, 1 small power strip, 6-port USB block
- Binder clips, zip ties, gaffer tape, clear tape, 2 gold sashes
- Rope + posts, lanyards, signs, boxes, 2 coolers
- Prize envelope, clipboard, Sharpie

Counts and where to buy: the Fair Day Playbook, Part 2.

BUILD ORDER

1. Both frames up, side by side, backs to the gym wall. Weights on all six legs.
2. Sidewalls: back, left, right, then the two front panels. The middle wall stays off.
3. Tie back the entrance (front-left) and the exit (right-front) with the sashes.
4. Cord in from the outlet, strip in the corner, TV cord along the left wall and out. Second cord along the back wall to the exit-table corner. Tape.
5. Stands up: iPads 1 and 3 by the back wall, 6 ft apart. iPad 2 between them, pulled 3 ft forward; the host stands behind it. Cables down the legs, taped.
6. Boxes and coolers into the back-right corner. Round table across the corner in front of them, worker behind it. Check the exit is wide open. TV table outside.
7. Lights: curtains clipped to the roof edge with banks on the legs, the lane, line 3, sunset lamp, clip light.
8. Signs, rope, lanyards. Laptop on the exit table with the sheet open. Walk it once as a visitor.
